www.uwlax.edu/grad/health-education/

The Master of Science in Community Health Education Program is designed to prepare individuals for employment in community health agencies, to administer and develop health education programs, to implement health education processes and concepts. Candidates are encouraged to tailor coursework to their particular interests and the health issues specific to their professional responsibilities. This is a non-thesis degree in which a student completes a four-credit "Graduate Project in Health Education" (HED 798) related to a focused health education health promotion issue.

Students must complete individually prescribed undergraduate course work to meet prerequisite requirements. Graduate students from other programs are not allowed to enroll in community health program graduate courses unless departmental approval has been given. Graduate credit will not be awarded for any course in which undergraduate credit was received.

Community Health Education Courses

CHE 405/505 Cr.3
Strategies for Increasing Physical Activity in Communities
This course is designed for community health educators who plan to work with clients and patients in a variety of health and clinical settings. Students will come away with an understanding of how to advance the use of physical activity for the prevention and treatment of chronic disease and other health issues. The course will explore how physical activity improves health, including cardiorespiratory and metabolic diseases, overweight and obesity, musculoskeletal disorders, cancers, and mental health. Data on the prevalence and economic costs are presented to demonstrate the scope of the health issues and the importance of addressing them. Evidence-based strategies for increasing physical activity in individuals and populations using three approaches (informational, behavioral and social, and environmental and policy) will be explored. Strategies for implementing physical activity opportunities in communities will also be addressed. This course is taught largely at an undergraduate level. Graduate students will have additional course requirements/expectations. Offered Spring.

CHE 453/553 Cr.1-3
Cultural Issues In Health Ed: Ethnic, Racial, Religious, and Familial Groups
A study of cultural influences on health and illness. Values and attitudes held by different groups in America's pluralistic society need to be considered in health program planning. Various racial, ethnic, and religious groups' health beliefs and practices will be examined. Cultural influences and patterns of communication within cultures and how these affect health care and utilization of services will be identified. The U.S. health care system will be analyzed in terms of serving its culturally diverse population. Designed for health professionals, this course will increase their sensitivity in working with people of various cultural origins. Repeatable for credit - maximum three. Offered Occasionally.

CHE 460/560 Cr.1
Medical Terminology for Health Education
Skill development for working with the special language used in clinics, hospitals, and other health agencies. Students in various health fields will learn to use medically related terms in their professional communication. Prerequisite: ESS 205 and ESS 206, or BIO 312 and BIO 313. Offered Fall, Spring.

CHE 466/566 Cr.1-3
Worksite Health Promotion
This course will focus on building an understanding of the components necessary for successful worksite health promotion. Included will be the development, implementation, and evaluation of worksite health promotion programs. There will be a direct emphasis on actual worksite conditions and situations, including constraints and advantages. The course will examine the relationship of a worksite health promotion program to the organization as a whole and the potential benefits for both the employee and the employer. Not repeatable for additional credit. Offered Occasionally.

CHE/SHE 475/575 Cr.1-3
Workshop in Health Education
Group study of varying health education topics, community agencies, and educational institutions. Repeatable for credit under different topics - maximum six credits combined CHE/SHE. (Cross-listed with CHE/SHE.) Departmental option for pass/fail grading. Consent of instructor. Offered Occasionally.

CHE 780 Cr.1-8
Community Health Education Preceptorship
Professional experience for graduate students in a variety of community health education and public health settings interacting with diverse populations for a semester or summer session. The candidate works under faculty supervision with a professional in health education and/or health promotion who serves as a mentor. Distinct health educator areas of responsibility are addressed. Repeatable for credit - maximum eight. Consent of department. Offered Fall, Spring, Summer.

Health Education Courses

HED 409/509 Cr.1
Stress Management and Relaxation Skills
An introduction to the detrimental effects of stress on an individual and the corresponding benefits of regular relaxation. This course will emphasize the basic skills of relaxation and will provide an experience that focuses on the practical application of these skills in one's life. Offered Fall, Spring.
HED 412/512 Cr.3  
**Women's Health Issues**  
This course will provide an opportunity for participants to identify major health issues confronting women today and to examine appropriate health prevention and health promotion lifestyle choices. It will explore health issues from the traditional medical model to the holistic model and provide a comprehensive overview of critical, contemporary women's health issues. Offered Occasionally.

HED 425/525 Cr.3  
**Violence and Injury Prevention**  
Participants will review the major forces leading to violent behavior and injury in the United States and globally. Trends over time will be carefully reviewed and analyzed in order to detect risk and protective factors. Violence and injury prevention strategies will be reviewed, resulting in the development of prevention and intervention proposals using community-based programming and curriculum development strategies. Offered Fall, Spring.

HED 467/567 Cr.1-2  
**Experiential Learning Strategies for Health Education**  
This course examines emerging educational processes, strategies, and issues and how they can be applied in the facilitation of health education and health promotion programs in the school and/or community setting. Topics will vary per offering and target audience. Prerequisite: HED 210 or teacher certification. Offered Occasionally.

HED 469/569 Cr.3  
**Drugs, Society, and Human Behavior**  
This course is directed at introducing social, psychological, pharmacological, and cultural aspects of drug use, misuse, and abuse. In addition, the methods, materials, and theories of drug abuse prevention in the school and community will be introduced. Prerequisite: BIO 100 or BIO 105. Offered Spring.

HED 472/572 Cr.3  
**Health Education Responsibilities, Competencies, and Certification**  
Participants will have the opportunity to review the National Health Educator Competencies Update Project research resulting in a new hierarchical model that serves as a framework for the responsibilities and competencies comprising the Entry, Advanced 1, and Advanced 2 levels. Each one of the seven responsibilities will be examined with practitioner examples, and a review will be conducted for the Certified Health Education Specialist (CHES) national examination. Weekend and online formats. Offered Occasionally.

HED 474/574 Cr.3  
**Nutrition Education**  
Basic principles of nutrition are covered as well as current problems and topics regarding both personal and world nutrition today. Designed for the public school teacher, the community health educator, or those in related fields. Offered Fall, Spring.

HED 475 Cr.3  
**Mental Health**  
Theory and application of principles of mental health in human relationships. Offered Occasionally.
HED 798 Cr.1-4
**Graduate Project in Health Education**
This capstone experience provides the health education master’s degree candidate with an opportunity for in-depth individual study of a health education problem and demonstration of advanced professional program development, implementation, and evaluation. The project will be planned and carried out under graduate faculty approval and supervision. An oral and written project presentation will be required. Repeatable for credit - maximum four. Consent of department. Offered Fall, Spring, Summer.

HED 799 Cr.1-4
**Research: Master’s Thesis**
Independent study on a problem selected for a thesis under the direction of a graduate faculty member. Repeatable for credit - maximum four. Prerequisite: HED 706. Consent of department. Offered Fall, Spring, Summer.
