The Master of Science in Community Health Education (MS-CHE) is an academic degree oriented toward students wishing to seek a career in teaching or conducting research at a college, university or other setting. The MS-CHE program prepares professionals to administer and develop health education programs, to implement health education processes and concepts, to understand current health issues, and to improve and sharpen skills appropriate to their current or projected career goals. The MS-CHE program provides students with the flexibility to select a health-related focus along with a number of courses to prepare them with the appropriately aligned skill sets. Graduates are encouraged to modify and adapt the program coursework to their particular interests and to the health issues specific to their professional responsibilities. The MS-CHE program is a non-thesis degree. The student will complete a four-credit "Graduate Project in Health Education" (HED 798) related to a focused health education health promotion issue. The MS-CHE program is offered primarily through evening campus-based classes. The course schedule is set-up and designed to best meet the needs of both the working professional and the full-time student. The smaller class sizes and professors who are accessible help to ensure student success.

Graduates Are Pre pared To:

• assess individual and community health needs
• plan effective health education and health promotion programs
• implement and evaluate educational experiences
• coordinate and manage the provisions of health education services
• serve as a resource in health education
• communicate health and health education needs, concerns and resources
• conduct health education and health promotion research

Graduates Are Employed In:

• public health agencies
• health departments
• voluntary and private agencies
• hospitals and other health care settings
• managed care organizations
• consulting firms
• local, state, and national governmental agencies
• international agencies
• business and industrial settings
• global health-related organizations

Students must complete individually prescribed undergraduate course work to meet prerequisite requirements. Graduate students from other programs are not allowed to enroll in community health program graduate courses unless departmental approval has been given. Graduate credit will not be awarded for any course in which undergraduate credit was received.

Community Health Education Courses

CHE 400/500 Cr.3
Health Policy, Advocacy, and Community Organizations
This course focuses on the process of engaging communities in health education and behavior change programs of various kinds. Several organizing paradigms for fostering healthy communities are examined, and their practical and ethical implications are considered. Skill development for community assessment, constituency-building, and leadership of participatory planning efforts is emphasized. Students are paired with health and human services, health policy and social justice agencies, and coalitions to gain an in-depth knowledge of agenda setting, legislative research, and legislative advocacy in relation to specific legislation being proposed in the Wisconsin state legislature. Course will tie policy theory to real-world practice. This course is taught largely at an undergraduate level. Graduate students will have additional course requirements/expectations. Prerequisite: PH 335; PH 340; CHE 360; CHE 370 or CHE 475 topic "Motivational Interviewing. Offered Fall, Spring.

CHE 405/505 Cr.3
Strategies for Increasing Physical Activity in Communities
This course is designed for community health educators who plan to work with clients and patients in a variety of health and clinical settings. Students will come away with an understanding of how to advance the use of physical activity for the prevention and treatment of chronic disease and other health issues. The course will explore how physical activity improves health, including cardiorespiratory and metabolic diseases, overweight and obesity, musculoskeletal disorders, cancers, and mental health. Data on the prevalence and economic costs are presented to demonstrate the scope of the health issues and the importance of addressing them. Evidence-based strategies for increasing physical activity in individuals and populations using three approaches (informational, behavioral and social, and environmental and policy) will be explored. Strategies for implementing physical activity opportunities in communities will also be addressed. This course is taught largely at an undergraduate level. Graduate students will have additional course requirements/expectations. Offered Spring.

CHE 430/530 Cr.3
Grant Writing and Resource Management
The grant seeking enterprise is studied and applied to community and public health organizations, in areas of perceived community need. Content includes locating and communicating with funding agencies, writing and reviewing grant proposals, analyzing requests for proposals, using technology in grant seeking, and implementing and evaluating grant funded projects. Project planning and administrative competencies are incorporated. Budget planning and grant administration is identified and applied. This course is taught largely at an undergraduate level. Graduate students will have additional course requirements/expectations. Prerequisite: CHE 380, CHE 400. Offered Fall, Spring.
CHE 453/553 Cr.1-3
Cultural Issues in Health Ed: Ethnic, Racial, Religious, and Familial Groups
A study of cultural influences on health and illness. Values and attitudes held by different groups in America's pluralistic society need to be considered in health program planning. Various racial, ethnic, and religious groups' health beliefs and practices will be examined. Cultural influences and patterns of communication within cultures and how these affect health care and utilization of services will be identified. The U.S. health care system will be analyzed in terms of serving its culturally diverse population. Designed for health professionals, this course will increase their sensitivity in working with people of various cultural origins. This course is taught largely at an undergraduate level. Graduate students will have additional course requirements/expectations. Repeatable for credit - maximum three. Offered Occasionally.

CHE 460/560 Cr.1
Medical Terminology for Health Education
Skill development for working with the special language used in clinics, hospitals, and other health agencies. Students in various health fields will learn to use medically related terms in their professional communication. This course is taught largely at an undergraduate level. Graduate students will have additional course requirements/expectations. Prerequisite: ESS 205 and ESS 206, or BIO 312 and BIO 313. Offered Fall, Spring.

Worksite Health Promotion
This course will focus on building an understanding of the components necessary for successful worksite health promotion. Included will be the development, implementation, and evaluation of worksite health promotion programs. There will be a direct emphasis on actual worksite conditions and situations, including constraints and advantages. The course will examine the relationship of a worksite health promotion program to the organization as a whole and the potential benefits for both the employee and the employer. This course is taught largely at an undergraduate level. Graduate students will have additional course requirements/expectations. Not repeatable for additional credit. Offered Occasionally.

CHE/SHE 475/575 Cr.1-3
Workshop in Health Education
Group study of varying health education topics, community agencies, and educational institutions. This course is taught largely at an undergraduate level. Graduate students will have additional course requirements/expectations. Repeatable for credit under different topics - maximum six credits combined CHE/SHE. (Cross-listed with CHE/SHE.) Departmental option for pass/fail grading. Consent of instructor. Offered Occasionally.

CHE 780 Cr.1-8
Community Health Education Preceptorship
Professional experience for graduate students in a variety of community health education and public health settings interacting with diverse populations for a semester or summer session. The candidate works under faculty supervision with a professional in health education and/or health promotion who serves as a mentor. Distinct health educator areas of responsibility are addressed. Repeatable for credit - maximum eight. Consent of department. Offered Fall, Spring, Summer.

Health Education Courses
HED 409/509 Cr.1
Stress Management and Relaxation Skills
An introduction to the detrimental effects of stress on an individual and the corresponding benefits of regular relaxation. This course will emphasize the basic skills of relaxation and will provide an experience that focuses on the practical application of these skills in one's life. This course is taught largely at an undergraduate level. Graduate students will have additional course requirements/expectations. Offered Fall, Spring.

HED 412/512 Cr.3
Women's Health Issues
This course will provide an opportunity for participants to identify major health issues confronting women today and to examine appropriate health prevention and health promotion lifestyle choices. It will explore health issues from the traditional medical model to the holistic model and provide a comprehensive overview of critical, contemporary women's health issues. This course is taught largely at an undergraduate level. Graduate students will have additional course requirements/expectations. Offered Occasionally.

HED 425/525 Cr.3
Violence and Injury Prevention
Participants will review the major forces leading to violent behavior and injury in the United States and globally. Trends over time will be carefully reviewed and analyzed in order to detect risk and protective factors. Violence and injury prevention strategies will be reviewed, resulting in the development of prevention and intervention proposals using community-based programming and curriculum development strategies. This course is taught largely at an undergraduate level. Graduate students will have additional course requirements/expectations. Offered Occasionally.

HED 467/567 Cr.1-2
Experiential Learning Strategies for Health Education
This course examines emerging educational processes, strategies, and issues and how they can be applied in the facilitation of health education and health promotion programs in the school and/or community setting. Topics will vary per offering and target audience. This course is taught largely at an undergraduate level. Graduate students will have additional course requirements/expectations. Prerequisite: HED 210 or teacher certification. Offered Occasionally.

HED 469/569 Cr.3
Drugs, Society, and Human Behavior
This course is directed at introducing social, psychological, pharmacological, and cultural aspects of drug use, misuse, and abuse. In addition, the methods, materials, and theories of drug abuse prevention in the school and community will be introduced. This course is taught largely at an undergraduate level. Graduate students will have additional course requirements/expectations. Prerequisite: BIO 100 or BIO 105. Offered Spring.

HED 471/571 Cr.2
Health Education Responsibilities, Competencies, and Certification
Participants will have the opportunity to review the National Health Educator Competencies Update Project research resulting in a new hierarchical model that serves as a framework for the responsibilities and competencies comprising the Entry, Advanced 1, and Advanced 2 levels. Each one of the seven responsibilities will be examined with practitioner examples, and a review will be conducted for the Certified Health Education Specialist (CHES) national examination. Weekend and online formats. This course is taught largely at an undergraduate level. Graduate students will have additional course requirements/expectations. Offered Occasionally.
HED 472/572 Cr.3

Sexual Health Promotion
A review of current information on health and human sexuality. Emphasis is given to biological, psychosocial, and educational aspects of human sexuality with special emphasis on instructional activities related to interpersonal communication, decision-making ability, and clarification of values. This course is taught largely at an undergraduate level. Graduate students will have additional course requirements/expectations. Prerequisite: ESS 205 or BIO 313, ESS 206 or BIO 312. Offered Fall, Spring.

HED 473/573 Cr.3

Health Aspects of Aging
An exploration of the lifelong aging process and an examination of health factors affecting the elderly. Emphasis is given to the changes in a variety of health areas including, but not limited to, physical activity, nutrition, mental health, long-term care, sexuality, and death, dying, and grief. The course will also include a service-learning component. This course is taught largely at an undergraduate level. Graduate students will have additional course requirements/expectations. Prerequisite: HED 210. Offered Fall, Spring.

HED 474/574 Cr.3

Nutrition Education
Basic principles of nutrition are covered as well as current problems and topics regarding both personal and world nutrition today. Designed for the public school teacher, the community health educator, or those in related fields. This course is taught largely at an undergraduate level. Graduate students will have additional course requirements/expectations. Offered Fall, Spring.

HED 485/585 Cr.1-3

Confrontations of Death
This course is designed to allow students to consider death both generally and on an individual basis. Various programs and experiences will be used to help individuals confront their own mortality and its relationship with the vitality of life. This course is taught largely at an undergraduate level. Graduate students will have additional course requirements/expectations. Offered Fall, Spring.

HED 495/595 Cr.1-3

Independent Study in Health Education
Individualized study of areas not available in existing courses. This course is taught largely at the graduate level. Repeatable for credit - maximum six. Consent of department. Offered Fall, Winter, Spring, Summer.

HED 701 Cr.3

Contemporary Issues in Health Education
Current basic issues and problems in health education. Designed to reinforce and extend the student’s knowledge of contemporary health issues as they apply to the improvement of personal, family, and community health. Offered Fall.

HED 703 Cr.3

Foundations in Health Education
A study of scientific, social, psychological, ethical, legal, and educational foundations of health education. Professional competencies and practice settings will be reviewed. Applications of health concepts and effective educational strategies will increase the competencies of health education planning and program implementation. Offered Fall.

HED 706 Cr.3-6

Research Tools and Processes
The design, analysis, and interpretation of qualitative and quantitative data relative to health education, health promotion, public health, medicine, and epidemiology are covered. Attention is given to assisting students in being critical consumers of the research literature as well as designing their own studies. Prerequisite: CHE 350 or CHE 380 or equivalent. Offered Fall, Spring.

HED 709 Cr.3

Helping Children and Youth Understand Human Sexuality
Teaching sexuality education in children and youth requires the understanding of specific topics, awareness and practice of ethical and legal practices, and development of specific sensitivity skills for delivering effective sexuality education programs. In addition, educators, parents, counselors, etc., need to feel comfortable discussing the variety of sexuality topics while also having a high level of self-efficacy for the subject’s delivery. This course supports these principles and provides an overview of reliable resources for children, youth, and adults. In addition, the National Teacher Preparation Standards for Sexuality Education were used for the creation of this course, in which the National Sexuality Education Standards are used as a guideline for instruction to children and youth. Offered Fall, Spring, Summer.

HED 725 Cr.1-3

Seminar in Health Education
Reading and reports on selected topics in health education. Repeatable for credit - maximum six. Prerequisite: permission of advisor. Consent of instructor. Offered Occasionally.

HED 752 Cr.3

Mental Health
Theory and application of principles of mental health in human relationships. Offered Occasionally.

HED 798 Cr.1-4

Graduate Project in Health Education
This capstone experience provides the health education master’s degree candidate with an opportunity for in-depth individual study of a health education problem and demonstration of advanced professional program development, implementation, and evaluation. The project will be planned and carried out under graduate faculty approval and supervision. An oral and written project presentation will be required. Repeatable for credit - maximum four. Consent of department. Offered Fall, Spring, Summer.

HED 799 Cr.1-4

Research: Master's Thesis
Independent study on a problem selected for a thesis under the direction of a graduate faculty member. Repeatable for credit - maximum four. Prerequisite: HED 706. Consent of department. Offered Fall, Spring, Summer.
