Physical therapists are health professionals educated at the doctoral level with expertise in the area of diagnosing and treating patients who have movement disorders. A professional doctoral degree involves extensive study over a wide range of courses integrating basic sciences with skilled professional practice. The practitioner must exhibit strong clinical skills and reasoning based on evidence-based rationale. Graduates will be able to enter practice with skills required to independently examine, evaluate, diagnose, render a prognosis, and assess outcomes for interventions in the management of impairments, functional limitations, and disabilities of the cardiopulmonary, musculoskeletal, neuromuscular, and integumentary systems. Graduates will also be able to provide health care that produces the best possible health outcomes and patient experiences for a reasonable cost. They must also be experts at advocating for consumers, caregivers and the physical therapy profession.

The graduate-level professional curriculum is nine semesters long. Six semesters will emphasize classroom and laboratory learning and take place on the UWL campus. The final three semesters (36 weeks) will be comprised of internships that take place off-campus and culminate with students returning to campus for a debriefing session. The purpose of the internship is to allow students to be mentored by a master clinician to ensure that didactic knowledge translates into applied skill. Internship sites are selected based upon their learning environment. Clinical instructors are located nationwide. Program graduates must also pass the National Physical Therapy Examination administered by the Federation of State Boards of Physical Therapy to be licensed to practice as a physical therapist.

Program length

The Doctor of Physical Therapy (DPT) Program is typically a three-year program. The program length is based on how long the required UWL coursework would take to complete for a full-time student who does not need to complete any prerequisite coursework. Program length may be extended if students attend part-time (if approved by program) or due to the requirements of an individual student’s plan of coursework, research or capstone project.

2023-24 Faculty/Staff

The following is the graduate faculty and staff as of the publication date of this catalog. This list will not be updated again until the next catalog is published in July.

Professor

Thomas Kernozek, Ph.D

Clinical Professor

Paul Reuteman, PT, DPT, MHS, OCS, LAT

Associate Professor

Patrick Grabowski, PT, Ph.D, OCS
John Greany, PT, Ph.D, FAACVPR
Thomas Greiner, Ph.D

Assistant Professor

Thomas Almonroeder, DPT, Ph.D
Steni Sackiriyas, PT, DSc

Clinical Assistant Professor

Inga Cluppert, PT, DPT
Hanni Cowley, PT, DPT, SCS
Michelle Olson, PT, DPT
Amy Taebel, PT, DPT, PCS

Research Program Manager

Drew Rutherford, MS

Administrative Support

Pete Amann
Emilee Mielke
Shauna Salow
Angela Wiste

Graduate degree

• Doctor of Physical Therapy - DPT (http://catalog.uwlax.edu/graduate/programrequirements/physicaltherapy/dpt/)

Courses

PTS/BIO/PAS 509 Cr.3

Human Gross Anatomy
A comprehensive consideration of human gross anatomy. Systems included are musculoskeletal, neurological, urogenital, gastrointestinal and cardiopulmonary. Function, development, and topographic correlations are emphasized as a means toward evaluating clinical applications. Biomechanical function, topographic and clinical applications are emphasized. Prerequisite: admission to the Biology CRNA Program, PAS Program, or DPT Professional Program; concurrent enrollment in BIO/PAS/PTS 510 under same department. (Cross-listed with BIO/PAS/PTS; may only earn credit in one department.) Offered Summer.
PTS/BIO/PAS 510 Cr.3
Applied Human Gross Anatomy
A comprehensive consideration of human anatomy including both neuro-musculoskeletal components and internal organ systems. Systems included are musculoskeletal, neurological, urogenital, gastrointestinal, and cardiopulmonary. The course provides an in-depth understanding of the gross anatomy of the human body through regional dissection. This understanding will then be demonstrated through the application of anatomy within clinical presentations. Prerequisite: admission to the Biology CRNA Program, PAS Program, or DPT Professional Program; concurrent enrollment in BIO/PAS/PTS 509 under same department. (Cross-listed with BIO/PAS/PTS; may only earn credit in one department.) Offered Summer.

PTS 512 Cr.4
Medical Physiology
The course examines the physiological function and regulation of major organ systems and their components in the human body and after injury or disease. The course covers normal physiology and interaction of body systems as well as selected diseases or injury. Concepts are organized by systems: endocrine, cardiovascular, respiratory, renal, gastrointestinal, nervous, hematologic, hepatic, reproductive, vascular, and genetics. Prerequisite: admission to DPT Professional Program. Offered Summer.

PTS 516 Cr.1
Physiological Regulation of Exertion and Disease
This course is designed to provide the student with an overview of the physiological basis of activity. The course emphasizes the various changes brought on by exercise to the normal and abnormal physiological systems. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in summer 1 courses; concurrent enrollment in PTS 517. Offered Fall.

PTS 517 Cr.1
Applied Physiological Regulation of Exertion and Disease
This applied course is designed to provide the student with an opportunity to apply the physiological principles in the evaluation of health and performance related fitness. Methods and protocols appropriate for screening for physical activity, health appraisal, assessment, and exercise prescription for apparently healthy individuals or those with controlled disease. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in summer 1 courses; concurrent enrollment in PTS 516. Offered Fall.

PTS 518 Cr.1
Motor Control, Learning and Development
This course will provide a theoretical and research evidence basis for normal movement via motor control, motor learning, and motor development literature. Students will formulate a basic understanding of what is known about typical control, learning and development of movement and how available knowledge applies to motor re-learning and control after a lesion or injury. These concepts will be discussed with respect to multiple patient populations and atypical movement will be introduced. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 1 courses; concurrent enrollment in PTS 519. Offered Spring.

PTS 519 Cr.1
Applied Motor Control, Learning, and Development
This course will explore principles of motor behavior within the context of interactive labs. Principles of motor behavior (motor control, motor learning, and motor development) will be applied to both typical and atypical populations. Students will practice applying what is known about control, learning and development of movement to motor re-learning and control after lesion or injury. These concepts will be discussed with respect to multiple patient populations and atypical movement will be introduced. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 1 courses; concurrent enrollment in PTS 518. Offered Spring.

PTS 520 Cr.1
Introduction to Physical Therapy Practice and Evaluation Techniques
This course is designed to expose the student to the multiple roles and professional behavior expectations of the physical therapist and gain insight into the importance of these roles in the context of today's health care system. This course will also introduce the student to the role of patient examination with emphasis on tests and measures related to palpation, goniometry and muscle strength testing. This course is concurrently taught with anatomy so students may apply knowledge of human anatomy to a clinical environment. Prerequisite: concurrent enrollment in PTS 521; admission to DPT Professional Program. Offered Summer.

PTS 521 Cr.2
Applied Introduction to Physical Therapy Practice and Evaluation Techniques
This course is taken concurrently with "Introduction to Physical Therapy Practice & Evaluation Techniques" (PTS 520). The applied experiences are designed to provide an opportunity to practice physical therapy examination with emphasis on tests and measures related to palpation, goniometry, and muscle strength testing. Prerequisite: concurrent enrollment in PTS 520; admission to DPT Professional Program. Offered Summer.

PTS 523 Cr.1
Physical Agents
This course provides an understanding of the physiological basis, scientific rationale for, and clinical application of: thermal, electrophysiology/electrotherapy, and electromagnetic physical agents. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in summer 1 courses; concurrent enrollment in PTS 524. Offered Fall.

PTS 524 Cr.1
Applied Physical Agents
This course is taken concurrently with "Physical Agents" (PTS 523). The applied experiences are designed to provide an opportunity to practice the clinical application and clinical decision making of: thermal, electrophysiology/electrotherapy and electromagnetic physical agents. Strategies and techniques to manage pain, edema, soft tissue dysfunction, loss of motion and weakness through direct interventions will be covered. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in summer 1 courses; concurrent enrollment in PTS 523. Offered Fall.

PTS 525 Cr.2
Kinesiology and Biomechanics of Normal and Abnormal Movement
The principles and theories of the biomechanics of human motion will be presented to develop analytical skills needed to assess normal and abnormal movement. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in summer 1 courses; concurrent enrollment in PTS 526. Offered Fall.
PTS 526 Cr.1
Applied Biomechanics and Kinesiology of Movement
This course provides introductory activities used in the development of student analytical skills to enable the assessment of normal and abnormal movement from a biomechanical perspective. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in summer 1 courses; concurrent enrollment in PTS 525. Offered Fall.

PTS 527 Cr.3
Clinical Foundations of the Physical Therapy Examination
This course is designed to instruct future clinicians on how to implement the examination/evaluation component of the Patient/Client Management Model of Physical Therapy. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in summer 1 courses; concurrent enrollment in PTS 528. Offered Fall.

PTS 528 Cr.2
Applied Clinical Foundations of the Physical Therapy Examination
This course will emphasize the skills of obtaining a client history, performing a systems review and selecting and administering appropriate tests and measures that have been presented in "Clinical Foundations of the Physical Therapy Examination" (PTS 527). Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in summer 1 courses; concurrent enrollment in PTS 527. Offered Fall.

PTS 535 Cr.2
Functional Neuroanatomy
This course will provide a detailed examination of the gross components associated with the central nervous system. This examination will be correlated with a review of the peripheral nervous system. Together, this information will be used to provide functional considerations of the nervous system that will then be used to explore the foundational basis for clinical applications in neurologic evaluation and interpretation. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 1 courses; concurrent enrollment in PTS 536. Offered Spring.

PTS 536 Cr.1
Applied Functional Neuroanatomy
This course will focus on the physical identification of structures associated with the central nervous system. This identification will occur through dissection, examination of stained sections and models, and through an overview of clinical imaging studies. These structures will be correlated with functional understandings to provide a basis for solving clinical relevant problem sets. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 1 courses; concurrent enrollment in PTS 535. Offered Spring.

PTS 543 Cr.1
Instrumentation for Human Movement
Development of knowledge and skills necessary for interpretation of human movement data pervasive in contemporary physical therapy literature. Topics will include methods of data acquisition using a force platform, pressure platform, pressure insoles and mats, video based motion analysis, posturography, and electromyography (EMG) as well as methods of processing, analyzing, and interpreting data. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in spring 1 courses; concurrent enrollment in PTS 544. Offered Summer.

PTS 544 Cr.1
Applied Instrumentation for Human Movement
Development of practical skills and experience in collecting human movement data with instrumentation. Data analysis and written reports associated with the analysis of movement will be required. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in spring 1 courses; concurrent enrollment in PTS 543. Offered Summer.

PTS 545 Cr.2
Foundations of Clinical Research
Research methodology with an emphasis on clinical research is the focus of this course. Methods for critically evaluating the literature, literature search strategies, ethics in research, issues of control, measurement, and basic elements of research design will be discussed. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 1 courses; concurrent enrollment in PTS 546. Offered Spring.

PTS 546 Cr.1
Applied Foundations of Clinical Research
Students will identify a gap in our knowledge base using primary literature and formulate a specific research question that could be answered using available resources. Students will develop a research proposal and oral defense of their research question, proposed methods, and expected clinical relevance. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 1 courses; concurrent enrollment in PTS 545. Offered Spring.

PTS 611 Cr.2
Pathophysiology and Differential Diagnosis
This course will provide the student with information about the pathophysiology of various organ systems and physiological control mechanisms as they pertain to the practice of physical therapy. Emphasis will be placed upon the ability of the student to perform differential diagnosis in a physical therapy setting and to determine when further diagnostics may be indicated. Patient problems will be utilized to allow students to practice differential diagnosis and problem solving. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in summer 1 courses. Offered Fall.

PTS 619 Cr.2
Early Intervention and Acute Care Physical Therapy
This course teaches the principles of care and therapeutic interventions used to treat patients during acute care and early intervention. Principles relate to healing status, prevention of injury, and rehabilitation for functional mobility. Content will focus on health care communication, early care techniques, and durable medical equipment to support mobility in the inpatient environment, home, and community. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 1 courses; concurrent enrollment in PTS 620. Offered Spring.
PTS 620 Cr.1
Applied Early Intervention and Acute Care Physical Therapy
This course will emphasize skill development to support physical therapy intervention targeting Early Intervention and Acute Care. Students will practice health care communication techniques, the prescription and fit of durable medical equipment, and therapeutic techniques to support rehabilitation of functional mobility. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 1 courses; concurrent enrollment in PTS 619. Offered Spring.

PTS 623 Cr.1
Integument System
In this course, the student will build on basic skin anatomy, physiologic basis of skin nourishment and repair, and biomechanical stresses that can impact on the skin. Factors predisposing the skin to breakdown will be presented as will preventive measures where appropriate. The student will learn specific examination and intervention techniques utilized in treating specific integumentary conditions including burns, wound care, and amputations. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in spring 1 courses; concurrent enrollment in PTS 624. Offered Summer.

PTS 624 Cr.1
Applied Integument
In this course, the student will build on basic skin anatomy, physiologic basis of skin nourishment and repair, and biomechanical stresses that can impact on the skin. Factors predisposing the skin to breakdown will be presented as will preventive measures where appropriate. The student will learn specific examination and intervention techniques utilized in treating specific integumentary conditions including burns, wound care, and amputations. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in spring 1 courses; concurrent enrollment in PTS 623. Offered Summer.

PTS 625 Cr.3
Physical Therapy Management of the Cardiovascular/Pulmonary System
This course focuses on normal and abnormal structure and function of the cardiovascular, pulmonary and lymphatic systems with emphasis on medical and other therapeutic strategies. Emphasis is placed on preventative measures and interventions for cardiac and pulmonary patients. Students evaluate current literature to support evidence-based practice and use a problem-solving approach to evaluate and manage patients. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 1 courses; concurrent enrollment in PTS 626. Offered Spring.

PTS 626 Cr.1
Applied Physical Therapy Management of the Cardiovascular/Pulmonary System
This course is taken concurrently with "Physical Therapy Management of the Cardiovascular/Pulmonary System" (PTS 625). The applied experiences are designed to provide an opportunity to practice examinations, evaluations, and interventions from cardiovascular, pulmonary and lymphatic cases and demonstrate psychomotor proficiency in each procedure. In addition, during this applied laboratory course the students are expected to integrate and synthesize information from a variety of problem-solving experiences. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 1 courses; concurrent enrollment in PTS 625. Offered Spring.

PTS 627 Cr.1
Therapeutic Exercise and Manual Therapy
This course teaches principles of intervention techniques used to treat patients following injury or illness. Content will focus on techniques of manual therapy, flexibility, strength and power training and functional recovery. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 1 courses; concurrent enrollment in PTS 628. Offered Spring.

PTS 628 Cr.1
Applied Therapeutic Exercise and Manual Therapy
This course will emphasize the psychomotor skills utilized to perform the material presented in "Therapeutic Exercise and Manual Therapy" (PTS 627). Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 1 courses; concurrent enrollment in PTS 627. Offered Spring.

PTS 631 Cr.2
Professionalism and the Ethos of Care
This course will give students an opportunity to search what it means to be in a caring profession. Students will explore the ethics of professional practice, fiduciary relationships, the rights and duties associated with the patient/therapist relationship and the role character plays in clinical decision-making. In response to the underlying values of respect for society, self and others, students will also explore the psychosocial variables that impact people with disabilities and their ability to cope. This course will emphasize the ethos of caring for others as a health professional, including diverse patient populations. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in summer 2 courses. Offered Fall.

PTS 651 Cr.1
Fieldwork: Introduction to Clinical Learning
A clinically based learning experience with an emphasis on practicing recently learned clinical skills on a patient population. Students will gain experience with medical chart reviews, taking subjective patient histories, practicing early assessment and intervention skills, performing basic patient handling techniques and exploring the role of a physical therapist within the health care team. Patient population will vary according to clinical setting where student is assigned. Prerequisite: admission to DPT Program; in good standing in program (academic & professional behaviors); successful progression through all preceding didactic coursework; completion of all clinical education preparatory material described in course syllabus. Pass/Fail grading. Offered Winter.

PTS 700 Cr.1-3
Selected Topics in Physical Therapy
This course offers in-depth study of particular concepts, clinical specialties, and/or non-traditional practice areas in physical therapy. Topics are selected by the instructor and/or as developed by student/faculty dialogue to meet special interests and needs. Topics are relevant to physical therapy education, and are not found elsewhere in the university curriculum. Repeatable for credit - maximum six. Prerequisite: admission to DPT Professional Program. Pass/Fail grading. Offered Fall, Spring.

PTS 701 Cr.1
Applied Adult Clinical Practice
This course provides the students with supervised hands-on experience working with adults with impairments and movement dysfunctions in a clinic type setting (health promotion/wellness). Students will incorporate theory, evidence, foundational science, and clinical skills under the general supervision of a physical therapist. Repeatable for credit - maximum two. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in summer 2 courses; PTS 751. Pass/Fail grading. Offered Fall, Spring.
PTS 702 Cr.1
Contemporary Practice in Neuromusculoskeletal Physical Therapy
This course will emphasize the implementation of the patient/client management model that reflects contemporary practice in neuromusculoskeletal physical therapy. The focus will be on content that is not covered in the standard neuromusculoskeletal content of the physical therapy curriculum. This course will also emphasize the instruction and implementation of the psychomotor skills needed to perform evidence-based hands on skills that reflect contemporary practice. The topics of this class will build upon the foundation of material already presented in the other neuromusculoskeletal courses sequenced in the curriculum. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 2 courses. Pass/Fail grading. Offered Spring.

PTS 703 Cr.1
Clinical Anatomy Review
This course will provide a review of neuromusculoskeletal anatomy that would be useful to the new or practicing clinician. Specific attention will be paid to an anatomical examination of diagnostic and therapeutic procedures. The topics of this class will build upon the foundation of anatomical and clinical courses from discipline specific curriculum. Prerequisite: admission to DPT, OT, or PAS Program; or health career professional. Pass/Fail grading. Offered Spring.

PTS 709 Cr.1
Health and Wellness in Physical Therapy Practice
In this course, students will focus on the role of the physical therapist in promoting principles of health and wellness for the purpose of risk identification and fitness promotion for individuals, groups, and communities throughout the lifespan by utilizing educational and prevention programs. Issues of health behavior, community access, efficacy of individual and group programs, and the development of health promotion programs will be explored. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in summer 2 courses. Offered Fall.

PTS 710 Cr.1
Applied Health and Wellness in Physical Therapy Practice
In this course, students will implement a community service-learning project to promote health and wellness for the purpose of risk identification and/or fitness promotion for individuals, groups, and communities. Outcomes of the program will be assessed and presented. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 2 courses; PTS 709. Offered Spring.

PTS 711 Cr.2
Pharmacology
This course is designed to provide coverage of typical pharmacologic agents encountered in both inpatient and outpatient rehabilitation settings. Content includes pharmacodynamics, pharmacokinetics, and biotransformation of drugs. Special emphasis will be placed on drugs that are commonly used to treat people receiving physical therapy. This course will likewise address how drug therapy interacts with physical therapy, and how drugs can exert beneficial effects as well as adverse side effects that impact on rehabilitation. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 2 courses. Offered Spring.

PTS 712 Cr.1
Clinical Radiology
This course presents an overview of medical diagnostics emphasizing indications and implications for imaging studies used to augment information obtained from the physical therapy examination. Topics include plain film x-ray, ultrasound, computed tomography, magnetic resonance imaging, and nuclear imaging. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in summer 2 courses. Offered Fall.

PTS 715 Cr.2
Musculoskeletal Examination and Intervention: Lower Extremity
This course will emphasize the implementation of the patient/client management model in the realm of musculoskeletal physical therapy of the lower extremity. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in summer 2 courses; concurrent enrollment in PTS 715. Offered Fall.

PTS 716 Cr.1
Applied Musculoskeletal Examination and Interventions: Lower Extremity
This course will emphasize the psychomotor skills included in the patient/client management model and utilization of material presented in "Musculoskeletal Examination and Intervention: Lower Extremity" (PTS 715). Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in summer 2 courses; concurrent enrollment in PTS 715. Offered Fall.

PTS 717 Cr.1
Clinical Teaching
This course explores the knowledge and skills required by physical therapists to educate patients, family members, other health care providers, colleagues, and future students. The role of a physical therapist as an educator will be thoroughly explored. The importance of becoming a lifelong learner will also be addressed. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in summer 2 courses; concurrent enrollment in PTS 717. Offered Fall.

PTS 718 Cr.1
Applied Clinical Teaching
In this course, students will apply the knowledge and skills required by physical therapists to educate patients, family members, other health care providers, colleagues, and future students. The role of a physical therapist as an educator will be thoroughly explored. The importance of becoming a lifelong learner will also be addressed. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in summer 2 courses; concurrent enrollment in PTS 717. Offered Fall.

PTS 728 Cr.2
Musculoskeletal Evaluation and Treatment: Spine
This course will emphasize the implementation of the patient/client management model in the realm of musculoskeletal physical therapy of the spine. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in spring 1 courses; concurrent enrollment in PTS 729. Offered Summer.

PTS 729 Cr.1
Applied Musculoskeletal Evaluation and Treatment: Spine
This course will emphasize the psychomotor skills included in the patient/client management model and utilization of material presented in "Musculoskeletal Evaluation and Treatment: Spine" (PTS 728). Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in spring 1 courses; concurrent enrollment in PTS 728. Offered Summer.
PTS 730 Cr.3
Physical Therapy for Children
In this lecture-based course, students will gain and apply knowledge in screening, examination, evaluation and diagnosis, prognosis, plan of care, and interventions for children with disabilities. Students will learn how to modify examination and interventions to match a child’s age and developmental level. Student knowledge from previous courses will be applied. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 2 courses; concurrent enrollment in PTS 731. Offered Spring.

PTS 731 Cr.1
Applied Physical Therapy for Children
In this lab-based course, students will gain psychomotor and affective skills in screening, examination, evaluation and diagnosis, prognosis, plan of care and interventions for children with disabilities. Students will learn how to modify examination and interventions to match a child’s age and developmental level. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 2 courses; concurrent enrollment in PTS 730. Offered Spring.

PTS 733 Cr.3
Health Administration
Primary emphasis for the joint portion of this course is to provide entry-level health care professionals with clinical administration and patient management skills in the context of the current health care system and an ethical practice environment. Topics of study will include characteristics of the global and US health care systems, reimbursement and insurance models, legal considerations, compliance with healthcare and reimbursement regulations and practice management. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 2 courses; concurrent enrollment in PTS 730. Offered Spring.

PTS 735 Cr.2
Adult Neurorehabilitative Physical Therapy I
The course will emphasize the integration of neuroanatomy, neurophysiology, motor control, motor learning, and the physical therapy management of adults with neuromuscular disorders. Students will assess and integrate recommendations and evidence for the principles and practices of neurorehabilitation physical therapy. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 2 courses; concurrent enrollment in PTS 730. Offered Fall.

PTS 736 Cr.1
Applied Musculoskeletal Examination and Interventions: Upper Extremity
This course will emphasize the psychomotor skills included in the patient/client management model and utilization of material presented in “Musculoskeletal Examination and Intervention: Upper Extremity” (PTS 737). Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 2 courses; concurrent enrollment in PTS 730. Offered Spring.

PTS 737 Cr.1
Adult Neurorehabilitative Physical Therapy II
The course will emphasize the integration of neuroanatomy, neurophysiology, motor control, motor learning, differential diagnosis and the physical therapy management of adults presenting with symptoms of dizziness and/or imbalance (e.g. concussion, stroke, cerebellar disorders, vestibular disorders) and spinal cord injuries (SCI). Students will learn and practice targeted assessment (including the selection and application of tests and measures), examination, intervention, principles and practices as they relate to the rehabilitation of a client presenting with symptoms of dizziness and/or imbalance or SCI. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 2 courses; concurrent enrollment in PTS 740. Offered Spring.

PTS 740 Cr.1
Applied Adult Neurorehabilitative Physical Therapy II
The course will emphasize procedures to support physical therapy management of adults presenting with symptoms of dizziness and/or imbalance (e.g. concussion, stroke, cerebellar disorders, vestibular disorders) and spinal cord injuries (SCI). Students will practice the selection and application of tests and measures, treatment techniques, equipment prescription, and outcome assessment and recommendations. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 2 courses; concurrent enrollment in PTS 739. Offered Spring.

PTS 741 Cr.2
Evidenced Based Practice in Physical Therapy
This course provides students with strategies for evaluating the evidence underlying physical therapy practice. Students will examine various levels of evidence ranging from systematic reviews to case studies in an effort to recognize opportunities to utilize evidence as a framework for determining best practice. Contemporary physical therapy research concepts will also be emphasized including selection, analysis, and incorporation of outcome measures into physical therapy practice, use of clinical prediction rules, and intent to treat analysis in prospective study designs. Finally, this course will provide students an opportunity to retrieve and assess information from the research literature that substantiates or challenges the use of physical therapy interventions for the treatment of movement disorders. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 2 courses; concurrent enrollment in PTS 740. Offered Fall.

PTS 742 Cr.1
Research Practicum
This course provides practical experience carrying out a research project under the guidance of the principal investigator(s). Students may be asked to participate in some of the following activities: search and critique the literature concerning the research problem, collect data, process, analyze and/or manage data, assist with statistical analysis, and/or interpret results. Repeatable for credit - maximum two. Prerequisite: admission to DPT Professional Program; satisfactory progression through all didactic coursework in fall 2 courses. Pass/Fail grading. Offered Fall, Spring.
PTS 751 Cr.2
Fieldwork: General Practice
The student will be assigned to a clinically based learning experience where they will practice basic skill acquisition in real time. Fieldwork placements will be with a general practitioner/clinical instructor (CI). Consistent with the services that may be provided in a general practice, students may be expected to provide supervised therapy for less complicated patients in any supervised setting including, but not limited to, acute care, extended care facility, home care, outpatient orthopedic, and pediatrics. Prerequisite: admission to DPT Professional Program; successful completion of all preceding didactic coursework; completion of all clinical education preparatory material described in the course syllabus; successful completion of PTS 651. Pass/Fail grading. Offered Summer.

PTS 798 Cr.1-3
Independent Study
Independent study of a special topic or problem related to physical therapy examination, intervention, diagnosis, prognosis, outcome assessment or professional practice. Physical therapy elective. Open to students after discussion with instructor. Repeatable for credit - maximum six. Prerequisite: admission to DPT Professional Program. Consent of instructor. Offered Occasionally.

PTS 831 Cr.1
Clinical Decision Making
This course introduces learners to clinical reasoning as a systematic process to assist practitioners in inferring or drawing conclusions about patient care. Prerequisite: admission to DPT Professional Program; successful progression through all prior DPT curriculum. Offered Fall.

PTS 851 Cr.6
Clinical Education Experience I
This course is the first in a series of three required physical therapy clinical education experiences whereby the student is assigned to a clinical facility under the direction and supervision of a physical therapist clinical instructor. Clinical experiences will be representative of settings where physical therapy is routinely practiced. Examples of settings include, but are not limited to, acute care hospitals, rehabilitation centers, home-care, outpatient clinics, schools, skilled nursing facilities, wellness centers, etc. The collective outcome of all three 12-week clinical education experiences will encompass patient care that ensures students are competent with management of patients across the lifespan and continuum of care. The patient management model will be applied to individuals with musculoskeletal, neuromuscular, cardiovascular, pulmonary, and integumentary problems. Prerequisite: admission to the DPT Program; in good standing in program (academic and professional behaviors); successful progression through all preceding didactic coursework; completion of all clinical education preparatory material described in the course syllabus; successful completion of PTS 651 and PTS 751. Pass/Fail grading. Offered Summer.

PTS 852 Cr.6
Clinical Education Experience II
This course is the second in a series of three required physical therapy clinical education experiences whereby the student is assigned to a clinical facility under the direction and supervision of a physical therapist clinical instructor. Clinical experiences will be representative of settings where physical therapy is routinely practiced. Examples of settings include, but are not limited to, acute care hospitals, rehabilitation centers, home-care, outpatient clinics, schools, skilled nursing facilities, wellness centers, etc. The collective outcome of all three 12-week clinical education experiences will encompass patient care that ensures students are competent with management of patients across the lifespan and continuum of care. The patient management model will be applied to individuals with musculoskeletal, neuromuscular, cardiovascular, pulmonary, and integumentary problems. Prerequisite: admission to the DPT Program; in good standing in program (academic and professional behaviors); successful progression through all preceding didactic coursework; completion of all clinical education preparatory material described in the course syllabus; successful completion of PTS 651 and PTS 751. Pass/Fail grading. Offered Fall.

PTS 853 Cr.6
Clinical Education Experience III
This course is the third in a series of three required physical therapy clinical education experiences whereby the student is assigned to a clinical facility under the direction and supervision of a physical therapist clinical instructor. Clinical experiences will be representative of settings where physical therapy is routinely practiced. Examples of settings include, but are not limited to, acute care hospitals, rehabilitation centers, home-care, outpatient clinics, schools, skilled nursing facilities, wellness centers, etc. The collective outcome of all three 12-week clinical education experiences will encompass patient care that ensures students are competent with management of patients across the lifespan and continuum of care. The patient management model will be applied to individuals with musculoskeletal, neuromuscular, cardiovascular, pulmonary, and integumentary problems. Prerequisite: admission to the DPT Program; in good standing in program (academic and professional behaviors); successful progression through all preceding didactic coursework; completion of all clinical education preparatory material described in the course syllabus; successful completion of PTS 651 and PTS 751. Pass/Fail grading. Offered Spring.

PTS 854 Cr.1
Capstone Project
Hybrid course with online and campus-based classes focusing on development of a written manuscript (case report, systematic literature review, or research manuscript) with faculty mentoring and oversight. Scholarly writing consistent with journal submission guidelines is required. Prerequisite: admission to the DPT Professional Program; good academic standing; satisfactory completion of all didactic coursework. Consent of instructor. Pass/Fail grading. Offered Fall, Spring, Summer.
