The undergraduate program in psychology at UW-La Crosse provides an excellent grounding in the discipline of psychology. The Department of Psychology offers courses in several important sub fields within psychology including developmental, educational, experimental, social, clinical, counseling, and cross-cultural. The psychology major is one of the most popular majors on campus. There are approximately 650 students pursuing a psychology major and 400 students pursuing a psychology minor. Graduating seniors report high levels of employment and approximately 30% of psychology undergraduates go on to graduate school. The major provides a strong grounding in both the liberal arts and the scientific method. Psychology students are particularly encouraged to pursue fieldwork, internships and/or research experience. Every year, a select number of advanced students present independent research projects at state, regional, and national conferences. Overall, psychology is a solid liberal arts major that allows students a variety of career opportunities.

Psychology admission to program policy

Students who wish to declare psychology as a major must complete Milestone #1 described below. In addition, in order to progress through the required courses associated with the major, students must also complete Milestone #2 described below. (This milestone must be met before enrolling in PSY 331).

- Milestone #1 = Complete online "new major" tutorial, have earned fewer than 75 credits, and complete a face-to-face meeting with a member of the psychology advising team in the Psychology Advising Center. If a student has earned 75+ credits and wishes to declare psychology as a first major, the student must also receive approval from the department chair by articulating a compelling reason why a major in psychology is necessary for the student's goals. A student may not declare psychology as a second major if they have already earned 75 credits. (This milestone must be met prior to enrolling in the required course, PSY 210).

- Milestone #2 = Earn a "C" or better in PSY 100 and STAT 145; complete ENG 110 and CST 110; have a combined GPA of at least 2.25 for these four courses; and complete a minimum of 30 credits. If PSY 100 and/or STAT 145 have not been completed in the past seven years with a "C" or better, students interested in declaring psychology as a major will need to audit and pass these courses to complete Milestone #2.

Students transferring to UWL with a college parallel associate degree may satisfy Milestone #2 by transferring PSY 100 and STAT 145 with grades of "C" or better (or by taking those courses at UWL and earning "C" or better). The other components of Milestone #2 will be waived:

ENG 110 and CST 110; GPA of 2.25 for PSY 100, STAT 145, ENG 110, and CST 110; 30 credit earned minimum.

Psychology credit by examination policy

Students may earn credit by examination for PSY 100 General Psychology (3 cr.). The following examinations are acceptable: Advanced Placement Program (AP) in psychology with a score of 3, 4, or 5; the "Higher Level" International Baccalaureate (IB) with a score of 4 or above; or the College Level Examination Program (CLEP) with a score of 47 or above. Students should contact the Counseling and Testing Center for information about CLEP; however, once a student has enrolled in PSY 100 they may not petition to earn credit with a CLEP exam.

General education writing emphasis

This department incorporates a significant amount of writing through the required courses instead of identifying particular courses as writing emphasis courses. Students who complete a major in this department will fulfill the general education writing emphasis requirement (http://catalog.uwlax.edu/undergraduate/generaleducation/#generaleducationrequirementstext).

2017-18 Faculty/Staff

The following is the department's faculty and staff as of the publication date of this catalog. This list will not be updated again until the next catalog is published in June.

Courses

+PSY 100 Cr.3

General Psychology
A comprehensive introduction to contemporary basic principles and theories of behavior and related processes along with supporting scientific evidence and applications. Topics include sensory processes, perception, learning, memory, motivation, emotion, developmental change, measurement, social interaction and abnormal behavior. Offered Fall, Spring, Summer.

PSY 200 Cr.1

Orientation to the Psychology Major
This course is an orientation to psychology as a major. It is designed for sophomore level students who have either declared or are considering psychology as a major. It is also appropriate for second semester freshmen or first semester juniors. The field of psychology as a discipline will be discussed as will career options related to the field. Students will be required to complete a variety of tasks designed to identify and/or clarify career paths and goals and increase their understanding of psychology as both an empirical and applied field. Prerequisite: PSY 100. Offered Fall, Spring.

PSY 204 Cr.3

Abnormal Psychology
This course introduces students to various clinical presentations of psychopathology that may occur throughout human development. It provides an overview of specific psychological disorders as well as disorder-specific etiological considerations, associated clinical features, defining characteristics, and diagnostic criteria. The course also includes overviews of current treatments for the major disorders, and ethical considerations in mental health care. Prerequisite: PSY 100 or PSY 212; sophomore standing. Offered Fall, Spring, Summer.

PSY 205 Cr.3

Effective Behavior
This course is a general overview of ways that psychological science can be applied to individuals’ lives to increase effective behavior. Course themes include exploring ways to improve enactment of roles through the lifespan such as student, parent, worker, and life partner. Topics may include: coping and stress; alcohol and drugs; relationships; and workplace skills and career issues. Prerequisite: PSY 100. Offered Annually.

PSY 210 Cr.3

Developmental Psychology
Designed for the psychology major as an introduction to developmental psychology, the course emphasizes the historical, theoretical and methodological approaches to human development across the lifespan. Psychological principles, concepts, and historical and recent research in the areas of prenatal, cognitive, language, social/emotional, and physical development are explored. Prerequisite: PSY 100; Psychology Milestone 1 (completion of psychology new major online tutorial and meeting with psychology advising coordinator.) Students may only earn credit in PSY 210 or PSY 212. Offered Fall, Spring, Summer.

PSY 212 Cr.3

Lifespan Development
An overview of human development from conception through death. It emphasizes major developmental milestones in several domains, including physical, cognitive and social/emotional. It also introduces students to prominent historical, theoretical, and methodological approaches to human development as well as to practical applications. Offered Fall, Spring, Summer.
PSY 241 Cr.3
Social Psychology
This course addresses the effects of the social context on human behavior. Topics may include attitudes; stereotyping and discrimination; aggression and prosocial behavior; and interpersonal relationships. It also examines the implications of social psychological principles in areas such as health, the environment and the legal system. Prerequisite: PSY 100 or SOC 110. Students may only earn credit in SOC 330 or PSY 241. Offered Fall, Spring.

ESS/PSY/WGS 259 Cr.1-3
Girls and Women in Sport
This course is an introduction to the involvement of girls and women with sport. It includes a historical perspective on women's sport participation, cultural images of women athletes, teaching and coaching implications of current research, Title IX, and recreation/leisure approaches to physical activity. Course content may vary according to instructor. (Cross-listed with ESS/PSY/WGS; may only earn credit in one department.) Offered Occasionally.

+PSY 282 Cr.3
Cross-Cultural Psychology
An orientation to the definitions, concepts, theories, and methodologies of cross-cultural psychology. Included is an examination of cultural and ecological factors and their influences on perceptual and cognitive processes, personality, language, and other psychological variables. Prerequisite: PSY 100. Offered Fall, Spring.

+PSY 285 Cr.3
Culture and Mental Health
This course provides an examination of the relationship between culture and mental health. Specific attention is given to the impact of racism, prejudice, and minority status on the lives of various American minority groups and how the effects of these factors reveal themselves within a mental health framework. An eclectic, multidisciplinary approach that draws from clinical and social psychology, as well as sociology, is utilized. Prerequisite: PSY 100; sophomore standing. Offered Annually.

PSY 291 Cr.1-3
Contemporary Topics in Psychology: Beginner
Introductory exploration of special topics relevant to the field of Psychology. Topics of specific interest to undergraduate students will be offered periodically. Offerings will be determined by staff/student interest and availability of teaching resources. Departmental approval is necessary to apply more than six credits toward the psychology major. Prerequisite: PSY 100. Offered Occasionally.

PHL/PSY 301 Cr.3
Theory of Knowledge
An intensive examination of three major questions: (1) What are the principal grounds of knowledge? (2) How certain can we be of what we think we know? (3) Are there limits beyond which we cannot hope to extend knowledge? Strong emphasis is placed on the problems of perception, learning, and knowledge representation. Prerequisite: PHL 100 or PHL 101 or PHL 120 or PHL 200 or PSY 100. (Cross-listed with PHL/PSY; may only earn credit in one department.) Offered Alternate Years.

PSY 302 Cr.3
Environmental Issues: Applied Psychology
This course is an exploration of psychological perspectives on environmental issues. Two trends associated with the relationship between human attitudes and behavior and the natural and built environments will be examined. First, the course will focus on what psychology has to offer in terms of explaining how attitudes and behaviors have contributed to the degradation of the natural environment. Second, it will focus on the synergistic relation between person and planetary well-being characteristic of the "green psychology" movement. Prerequisite: PSY 100 or ENV 201. Offered Occasionally.

PSY 305 Cr.3
Human Sexuality
This course is an exploration of human sexuality from biological, psychological, and social perspectives throughout the lifespan. Sexual attitudes and behaviors reflecting a broad spectrum of typicality and experience will be discussed. Prerequisite: PSY 100; minimum of 45 credits earned. Offered Fall, Spring.

PSY 307 Cr.3
Intimate Relationships
This course explores the development and life cycle of cross-sex and same-sex intimate relationships (e.g., dating, romantic, and marital partnerships). The course will focus on topics such as: human need for relationships, interpersonal attraction, love, attachment, communication, relationship development and maintenance, sexually, jealousy, conflict and aggression. Conditions influencing relationships such as illness, aging, poverty, trauma, and intimate partner violence will be examined. The course will also highlight factors associated with relationship success and/or dissolution. Students will engage with the theory, research, and practical application of the course material. Prerequisite: PSY 100 or PSY 212; junior standing. Offered Annually.

PSY 308 Cr.1-2
Research Apprenticeship
This course offers research experience under the supervision of a faculty member. The student will assist a faculty member in any phase of the research process including literature searches, formulation of instruments, pilot studies, data collection, data coding, and computer analysis. Repeatable for credit - maximum six. Prerequisite: PSY 331; junior standing. Consent of department. Offered Fall, Spring.

PSY 309 Cr.1
Volunteer Experience in Psychology
This course provides students with opportunities to gain practical experience through interaction with a variety of age groups. This supervised fieldwork requires 30 hours on site per semester. Repeatable for credit - maximum two. Prerequisite: PSY 100, PSY 210 or PSY 212; Psychology Milestone 1 (completion of psychology new major online tutorial and meeting with psychology advising coordinator.) Offered Fall, Spring.

PSY 315 Cr.3
Behavior Modification
This course will examine the theory and techniques of systematic behavior management and behavior control. Applied social learning theory, reinforcement, shaping, modeling, cognitive and rational techniques, extinction, aversive procedures, and token economies will be covered. Course will include the planning, execution, and evaluation of a personal behavior self-modification program, and several other opportunities to apply behavioral principles to everyday experiences. Prerequisite: PSY 100, PSY 204; PSY 210 or PSY 212. Offered Annually.
PSY 316 Cr.1-3
Child Abuse and Neglect
This course provides an overview of child abuse and neglect from historical and contemporary perspectives. The course will cover causes, consequences, and contextual factors associated with child maltreatment. Interventions for children, families, caregivers, and community will be covered. Topics include physical and emotional abuse and neglect, sexual abuse, reporting and investigation, and prevention and treatment for victims and abusers. Prerequisite: PSY 210 or PSY 212; junior standing. Offered Occasionally.

+PSY 318 Cr.3
Psychology of Women
Theories and research concerning the biological, psychological, and social aspects of female functioning will be evaluated. The course will analyze psychological literature that addresses itself to the experience, development, and behavior of women from different ethnic and cultural backgrounds. Prerequisite: PSY 100; sophomore standing. Offered Fall, Spring.

PSY 319 Cr.3
Men and Masculinities
This course examines everyday life using the theories, methods, and findings from the psychology of men and masculinities. The psychology of men is analyzed from multiple perspectives including biological, social learning, feminist, and social constructionist theories. The course considers the role of patriarchy, biology, the media, and other factors that shape the lives of individuals and social groups. Specific topics include men's mental and physical health, violence, work, and diversity. Prerequisite: PSY 100 or PSY 212 or WGS 100 or WGS 130 or EFN 205. Offered Occasionally.

PSY 320 Cr.3
Human Motivation
This course examines contemporary and historical psychological conceptions, principles, and theories of human motivation. Concern is given to physiological, cognitive, emotional, and social factors that influence human's desires, aspirations, and behaviors. Practical applications to multiple areas including education, industry, health, and everyday situations will be considered. Prerequisite: PSY 100 and PSY 210; or PSY 212. Offered Occasionally.

PSY 321 Cr.3
Research Methods for Psychology Minors
Introduction to the research methods associated with psychological research for psychology minors. Consideration given to formulation of problems, techniques for gathering data, and the presentation and interpretation of research. Focus on an ability to critically evaluate social science research. (Not required of students who major in CST or SOC or WGS). Prerequisite: PSY 100; 45 earned credits. Not open to psychology majors. Offered Fall, Spring.

PSY 331 Cr.4
Experimental Psychology: Lecture and Laboratory
This course provides an introduction to experimental and other research methods as used in psychology. The emphasis is on the scientific method, techniques of data collection, and the principles and theories employed in the study of behavior and mental processes. The laboratory portion develops skills in observation, formulating research ideas and hypotheses, designing and conducting research, data analysis, and scientific report writing. Prerequisite: Psychology Milestone 2 (“C” or better in PSY 100 & STAT 145; complete ENG 110 & CST 110; combined GPA of at least 2.25 in these four courses; completion of 30 cr.); three other credits in PSY. Open to psychology majors only. Offered Fall, Spring.

PHL/PSY 333 Cr.3
Philosophy of Mind
A study of the nature of the mind from both philosophical and psychological perspectives. The course will focus on important attempts to solve the mind-body problem, how mind and body are related and also will address the related problems of consciousness, intentionality, free will and personal identity. Prerequisite: PHL 100 or PHL 101 or PHL 200 or PSY 100. (Cross-listed with PHL/PSY; may only earn credit in one department.) Offered Alternate Years.

PSY 334 Cr.3
Health Psychology
This course will examine the role of psychological factors in health, wellness, and illness. The focus will be on the interdependence of physiological, psychological, and sociocultural factors on the experience and treatment of acute and chronic illness. There will be a strong emphasis on the mind/body connection and evidence-based mind/body interventions (e.g., physical, psychological, spiritual, social, emotional, and intellectual). Ethical considerations, multicultural contexts, and public policy issues in treatment and research will be considered. Prerequisite: PSY 100 and six additional credits in PSY; or PSY 100 and BIO 312 or ESS 205. Offered Fall, Spring.

PSY 343 Cr.3
Group Dynamics
This course focuses on the structure and function of groups. Topics covered may include communication, process losses, leadership, problem-solving, improving the effectiveness of groups and intergroup relations. Prerequisite: PSY 100 or SOC 110. Not open for credit to students who have completed or are enrolled in CST 365 and/or SOC 334. Offered Annually.

PSY 347 Cr.3
Empathic Listening Skills
This course is designed to clearly define empathic listening skills within a multicultural context. Students will learn to differentiate listening from psychotherapy and will practice listening skills. Topics include values identification, basic listening skills, in-depth exploration skills, and action planning without counseling. Ideal for those who will plan to work in a human services setting. Prerequisite: PSY 100; second semester sophomore standing. Offered Fall, Spring.

PSY 355 Cr.3
Infancy and Early Childhood
This course will provide students with an in-depth examination of human development during infancy and early childhood (conception through approximately age five) from a multidimensional perspective. Normative development in the following areas will be examined: prenatal, physical, perceptual, cognitive, language, social and emotional. Legal and public policy implications will be discussed. Research methodology and theoretical perspectives will be integrated throughout each topic area. Prerequisite: PSY 100 and PSY 210; or PSY 212. Offered Occasionally.

PSY 356 Cr.3
The School-aged Child
This course focuses on basic principles, theories, and research in human development from conception through middle childhood (ages 5-12 approximately). Topics include physical, cognitive, language, social/ emotional and personality development. Both the biological/genetic (nature) and the environmental (nurture) influences on development will be examined within each developmental area. Prerequisite: PSY 100 and PSY 210; or PSY 212. Offered Annually.
PSY 357 Cr.3
Adolescence
Focusses on the developmental tasks of adolescence and the influence of family, peers, school and society. Topics include historical perspectives, cognitive and moral development, self-concept, sexuality, vocational choice, and problems of adolescence. Prerequisite: PSY 100 and PSY 210; or PSY 212. Offered Annually.

PSY 358 Cr.3
Adulthood
An overview of the 'journey of adulthood' including both continuity and change. It introduces students to major historical and theoretical perspectives on adult development as well as primary methodological techniques for studying adult development. It examines milestones and transitions in traditional developmental domains (physical, cognitive and social and emotional) and explores individual responses and adjustments in these experiences. Prerequisite: PSY 100 and PSY 210; or PSY 212. Offered Annually.

PSY 359 Cr.1
Aging and the Elderly
The study of aging and older persons from a psychological perspective. It highlights physical, cognitive, emotional and social characteristics of old people and developmental changes associated with aging processes. Special attention is focused on the differences between typical aging and disease-related conditions associated with aging. Attention also is focused on diversity in the experience of aging and on practical applications. Prerequisite: PSY 358 or concurrent enrollment. Offered Occasionally.

PSY 360 Cr.3
Cross Cultural Human Development
This course represents a blend of cross-cultural concepts and human development (across the lifespan) and will seek to explore the influence of culture on various aspects of human development. More specific topics include the role of culture on: socialization, physical growth, cognition, self and personality, sex and gender, social behavior, family relations, and health. Prerequisite: PSY 100; PSY 210 or PSY 212. Offered Annually.

PSY 370 Cr.3
Educational Psychology
This course examines the application of psychological principles to school learning. Topics include theories of learning, individual differences, motivation, classroom management, measurement and evaluation, and effective teaching. The content will be discussed in relation to current issues and problems. Prerequisite: one of the following: PSY 210, PSY 212, ECE 212, ESS 207, or ESS 200. Offered Fall, Spring, Summer.

PSY 376 Cr.3
Industrial/Organizational Psychology
Psychological principles, concepts and methods applicable to organizational and industrial situations and practices. Topics include personnel selection, placement and evaluation; training; motivation; leadership; and social factors in organizations. Prerequisites: six credits in psychology; junior standing. Offered Annually.

PSY 377 Cr.3
Psychology and Law
This course examines a variety of ways that psychology intersects with the legal system. Topics include criminal profiling, false confessions and eyewitness misidentification, forensic assessment of competency and insanity, jury selection and decision-making, the impact of race in criminal sentencing, the philosophy and psychology of imprisonment, workplace harassment and discrimination, and roles for psychologists in the legal system. Prerequisite: PSY 100 or SOC 110 or SOC 120 or ANT 101. Offered Occasionally.

PSY 391 Cr.1-3
Contemporary Topics in Psychology: Intermediate
Intermediate consideration of contemporary topics related to psychological theories and research methods. Topics of specific interest to undergraduate students will be offered periodically. Offerings will be determined by staff/student interest and availability of teaching resources. Credit, prerequisite and format will vary according to the specific topics selected and the target student group. Departmental approval is necessary to apply more than six credits toward the psychology major. Offered Occasionally.

PSY 403/503 Cr.3
Advanced Psychopathology
This course focuses on selected topics in the area of clinical and abnormal psychology and is designed to provide in-depth knowledge of advanced current issues in the field. It helps prepare students for the field of human services by offering additional information beyond that conveyed in the abnormal psychology course on the diagnosis and treatment of a number of psychological disorders. Prerequisite: PSY 204; junior standing. Offered Occasionally.

PSY 404 Cr.3
Counseling and Personality Theories
A comprehensive conceptual review of theories of psychotherapy and counseling with a focus on the processes of change. The theories examined include the psychodynamic, person-centered, gestalt, behavioral, cognitive-behavioral, solution-focused, marriage and family therapy, and group therapy. Divergence and convergence among the theories will be examined. This course will focus on the presentation of a transtheoretical analysis of these major theoretical views and methods used in psychotherapy. The course will emphasize the pragmatic and integrated qualities of major theories of psychotherapy and counseling. Prerequisite: PSY 100 or PSY 212; PSY 204; PSY major with completed Psychology Milestones 1 & 2 or declared psychology minor, criminal justice minor, or at risk child/youth care minor. Offered Fall, Spring.

PSY 405 Cr.1-2
Teaching Apprenticeship in Psychology
This course provides preparation and experience in a variety of instructional practices, strategies and techniques. Students study theory and research on teaching and practice teaching skills under the guidance of faculty members. Repeatable for credit - maximum six. Prerequisite: junior standing; minimum 3.25 cumulative GPA. Consent of instructor. Pass/Fail grading. Offered Fall, Spring.

PSY 406 Cr.3
Positive Psychology
Positive psychology explores the enhancement of human experience for individuals, families, and communities rather than a focus on mental illness. The course examines attitudes, traits, behaviors, and environments associated with well-being. Emphasis will be placed on both understanding the concepts as well as the possible avenues for application to students' lives. The course offers opportunities for self-assessment and the ability to demonstrate individual understanding of the research base supporting the field. Prerequisite: PSY 100; PSY 204; PSY 210 or PSY 212; junior standing. Offered Occasionally.

PSY 407 Cr.3
Children's Cognition
This course will examine contemporary theories and current research on children's cognition, focusing on the years from birth to early adolescence. Topics considered will include biological bases of cognitive development; Piagetian and neo-Piagetian theory, sociocultural theories of cognition, information-processing approaches to children's memory and problem solving, the development of social cognition, and schooling and cognition. Prerequisite: PSY 210 or PSY 212. Offered Annually.
ECO/GEO/HIS/POL/PSY/SOC 408 Cr.4
Teaching and Learning History & Social Studies in the Secondary School
This course will be integrated with a field experience. In the context of a real classroom, teacher candidates will learn how to plan for and assess student learning in history and social sciences. With a focus on content knowledge, teacher candidates will plan a variety of meaningful learning experiences, assess student learning, and monitor and modify instruction to best support the individual learners in the classroom. The teacher candidate will design, enact, and assess activities that advance student understanding to more complex levels. Teacher candidates will gain experience in monitoring the obstacles and barriers that some students or groups of students face in school and learn how to design learning experiences to support all learners. Prerequisite: EDS 351. (Cross-listed with ECO/GEO/HIS/POL/PSY/SOC; may only earn credit in one department.) Offered Fall, Spring.
PSY 410/510 Cr.3
Advanced Developmental Psychology
An in-depth study of important topics in developmental psychology. Relevant theories and recent research in social development, cognitive development, moral development, language development, and emotional development will be evaluated. Prerequisite: PSY 210 or PSY 212; PSY 321 or PSY 331; STAT 145; junior standing. Offered Occasionally.
ERS/PSY 415 Cr.3
Multicultural Counseling
This course focuses on the effects of culture on the nature and behavior of individuals, their adaptations to institutions and environments, and their relations within and outside their culture. Specifically, the impact of concepts such as ethnocentrism, stereotypes, racism and prejudice are explored in terms of their relevance to the counseling process. Counseling strategies and skills relevant to providing effective multicultural counseling are investigated. Prerequisite: PSY 100, PSY 204. (Cross-listed with ERS/PSY; may only earn credit in one department.) Offered Annually.
PSY 417 Cr.3
Child and Adolescent Psychopathology
An examination of psychological disorders which first appear during infancy, childhood and adolescence. This course covers the etiology, diagnosis, classification, treatment, and prevention of psychological disorders from different theoretical orientations. Special emphasis is placed on applying basic concepts and empirical data to various professional settings and to social policy issues. Prerequisite: PSY 210 or PSY 212; PSY 204. Offered Fall, Spring.
PSY 420/520 Cr.3
Advanced Research Methods
An advanced course in the quantitative and logical aspects of statistical analysis, interpretation and design of behavioral science research and experimentation. Major emphasis is on the conceptual rather than the computational aspects of quantitative methods. Recommended for those planning graduate work in psychology or related fields. Prerequisite: PSY 100; PSY 210; grade of "B" or better in PSY 321 or PSY 331; grade of "B" or better in STAT 145 or admission to Psychology Honor Program; junior standing. Offered Spring.
PSY/SOC 422 Cr.3
Death, Grief, and Bereavement
A study of the interaction of individuals and families coping with dying and death in various social settings including hospitals, care facilities, and hospices. Topics include psychosocial aspects of grief and mourning, sociological dimensions of bereavement, and various rituals of funeralization in the U.S. and other societies. Special attention is given to case studies and medical/ethical decision-making at the end of life, as well as other aspects of the social organization of death, dying, and bereavement. Prerequisite: PSY 100 or SOC 110 or SOC 120 or ANT 101; junior standing. (Cross-listed with PSY/SOC; may only earn credit in one department.) Offered Annually.
PSY 426/526 Cr.3
Addictive Behaviors
Study of the personality characteristics of individuals experiencing substance abuse, dependency, and compulsive behaviors such as eating disorders and gambling. The focus will be on abuse as a maladaptive response to the demands of life. Special topics will include consumptive patterns, level of dependence, neurological status, assessment, and contemporary treatment techniques. Prerequisite: PSY 100; PSY 204; PSY 210 or PSY 212, junior standing. Offered Annually.
PSY 430 Cr.3
Cognitive Neuroscience
This course focuses on the utilization of a biological approach to understanding mental phenomena and behavior. Biological information includes the development and structure of the central nervous system, neuroanatomy and physiology, the function of basic neural events, neurotransmitters, neuropharmacology, hormones, evolution of behavior, brain development, neuroplasticity, and response to neural damage. Topics associated with how neural events influence human phenomena may include biological rhythms, consciousness, perception, sleep and dreaming, emotions, aggression, stress, learning, memory, and cognition. Prerequisite: PSY 100; PSY 321 or PSY 331 or BIO 312; junior standing. Offered Annually.
PSY 431 Cr.3
The Study of Consciousness
A comprehensive examination of conscious and nonconscious states of awareness. The course will explore contemporary cognitive theories on the nature of consciousness and its role and functioning in human behavior. The course also will cover states of consciousness (i.e., sleep and dreaming) as well as alterations in consciousness through hypnosis and psychedelic drugs. Prerequisite: PSY 100; BIO 312 or PSY 321 or PSY 331 or PHL 333. Offered Occasionally.
PSY 432 Cr.3
Learning and Memory
A study of the fundamental concepts and principles of human and animal learning and contemporary topics in human memory. Specific topics include classical and operant (instrumental) conditioning, concept and skill learning, memory storage, and retrieval, forgetting, and the use of information. Prerequisite: PSY 100; PSY 321 or PSY 331. Offered Annually.
PSY 434/534 Cr.3
Clinical Neuropsychology
This course examines the relationship between brain functioning and cognition, behavior, and emotion. The course covers neuroanatomy, neurophysiology, and neuropsychological assessment. The history, rationale, goals, and procedures of neuropsychological assessment will be explored alongside the role that neuropsychologists play in the evaluation and treatment of individuals with disorders (e.g. dementia, stroke, or traumatic brain injury). Prerequisite: PSY 100, PSY 321 or PSY 331 or BIO 312; junior standing. Offered Annually.
PSY 435/535 Cr.3

Cognitive Processes
This course examines theories, models, and related experimental research concerning human mental processes. Topics include acquisition of information, memory, decision-making, problem solving, and language. Prerequisite: PSY 100, PSY 321 or PSY 331; junior standing. Offered Annually.

PSY 436/536 Cr.3

Psychology of Language
An introductory course in psycholinguistics concerned with the comprehension, production and acquisition of language. Other topics include: language and thought, reading, writing, bilingualism, figurative language, metalinguistic skills, and the neuropsychology of language. Prerequisite: PSY 100; PSY 321 or PSY 331; junior standing. Offered Annually.

PSY 439 Cr.3

Sensation and Perception
Survey of the physiology and psychology of the human senses (e.g. vision, audition, smell, taste, and the skin senses) and the role they play in the attainment of knowledge and the regulation of behavior. In addition, the course will examine the various perceptual processes through which we interpret and restructure sensory information as we respond to changes in the environment. Prerequisite: PSY 100; PSY 321 or PSY 331 or BIO 312. Offered Annually.

PSY 440 Cr.3

Psychopharmacology
A study of the movement of psychoactive drugs into, around and out of the body, with an emphasis on the drug’s site of action, therapeutic effects, side effects and possible clinical uses. Prerequisite: PSY 100: PSY 321 or PSY 331 or BIO 312; junior standing. Offered Annually.

PSY 441/541 Cr.3

Advanced Social Psychology
The course will provide coverage of methodology and statistics most frequently encountered in social psychology and cover topics both of classic and current interest such as stereotypes and prejudice, medical social psychology, environmental psychology, social interdependence, leadership, and power. Prerequisite: completion of Psychology Milestones 1 & 2; Grade of “B” or higher in PSY 241 or SOC 330; STAT 145; junior standing. Offered Occasionally.

ERS/PSY 442 Cr.3

Racism and Oppression
This course focuses on psychological theory and research regarding individual, group, historical, institutional, and societal causes of racism and oppression. The manifestations and consequences of racism and oppression are examined as are the challenges inherent in reducing racism and oppression. Both historical and contemporary racism and oppression in a global context are analyzed. Prerequisite: ERS 100 or PSY 241 or PSY 285 or SOC 330; junior standing. Students with credit in ERS/PSY 443 cannot earn credit in ERS/PSY 442. (Cross-listed with ERS/PSY; may only earn credit in one department.) Offered Occasionally.

ERS/PSY 443 Cr.3

Prejudice and Stigma
This course explores the psychological underpinnings of prejudice and stigma from an empirical, research-based perspective. In addition to covering well-recognized forms of prejudice such as racism, the course examines discrimination more broadly in terms of its impact on those who stigmatize and those who are stigmatized. Prerequisite: PSY 100; PSY 241 or SOC 330; PSY 321 or PSY 331. Students with credit in ERS/PSY 442 may not earn credit in ERS/PSY 443. (Cross-listed with ERS/PSY; may only earn credit in one department.) Offered Occasionally.

PSY 450 Cr.2-3

Fieldwork Experience in Psychology: Undergraduate Internship
An academically relevant field experience for majors in psychology. The field experience will be arranged through Career Services and supervised by psychology instructional coordinator. No more than three credits may be applied to a major in psychology. Prerequisite: PSY 100, PSY 210; cumulative GPA of 2.30; junior standing; completion of Psychology Milestones 1 & 2. Consent of instructor. Offered Fall, Spring, Summer.

PSY 451/551 Cr.3

Psychological Measurement
Principles and procedures for the psychological measurement of human differences. This course examines the development, quantitative interpretation, uses, distinctive and desired characteristics of tests of intelligence, aptitudes, achievement, occupational interests and personality. Prerequisite: PSY 100; PSY 321 or PSY 331; grade of "C" or better in STAT 145; junior standing. Offered Fall, Spring.

PSY 459 Cr.3

Genes and Behavior
This course provides an overview of how psychologists study genetic influences on human behavior and examines the roles that heredity and environment play in influencing individual differences in behavior. This course will critically evaluate behavioral genetics research on a variety of dimensions of human behavior, ranging from IQ and personality to clinical disorders, such as alcoholism, depression, and schizophrenia. Prerequisite: PSY 100; PSY 210 or PSY 212; PSY 321 or PSY 331 or BIO 312. Offered Occasionally.

PSY 461 Cr.3

History and Systems of Psychology
A study of the philosophical and empirical foundations of modern psychology. Outstanding contributions by individual scholars and the development of major systems of thought within the field. Recommended for students considering graduate school in psychology. Prerequisite: PSY 100; PSY 321 or PSY 331; STAT 145; junior standing. Offered Occasionally.

PSY 481 Cr.1-3

Individual Projects in Psychology
Directed readings, research, or other individualized projects in psychology under the supervision of an instructor. Open to students who are in good standing. Registration requires consent of supervising instructor and department chair. Repeatable for credit - maximum six. Prerequisite: 12 credits in psychology. Consent of instructor. Offered Fall, Spring.

PSY 482 Cr.1-3

Honors Projects in Psychology
This course allows psychology honors students to complete their independent research projects. Honors students must enroll for a total of three credits (over one or two semesters). Repeatable for credit - maximum three. Prerequisite: PSY 420, PSY 489. Consent of department. Offered Fall, Spring.

PSY 485 Cr.1

Appraising Psychology Seminar
This seminar is designed to actively involve students in the assessment of their psychology education. Students will complete a variety of measures as well as provide in-depth feedback about the psychology major. Students are expected to reflect on themes, debates, and issues in the field of psychology. Prerequisite: senior standing; psychology major/minor. Pass/Fail grading. Offered Spring - Odd Numbered Years.
PSY 489 Cr.3
**Honors Seminar**
Students develop introductions and methods for independent research projects. Designing sound proposals and grappling with research design issues are the main foci of the course. Projects are completed under the supervision of a faculty adviser (PSY 481). Prerequisite: acceptance into Psychology Honors Program; PSY 100, PSY 331; PSY 420 (may be taken concurrently); STAT 145; junior standing. Consent of department. Offered Spring.

PSY 491 Cr.1-3
**Contemporary Topics in Psychology: Advanced**
This course provides in-depth consideration of significant new areas of development in the field of psychology. Topics of interest to traditional and nontraditional students will be offered on an irregular basis. Credit, prerequisite, and format will vary according to the specific topic selected and the target student group. Offered Occasionally.

PSY 495 Cr.3
**Senior Seminar in Psychology**
This seminar is designed to give graduating Psychology majors a small classroom experience for more intensive study of a specific area or problem in the field of psychology. Through discussion, interactive activities, and project development, students will work closely with each other and the instructor to go deeper into an interesting topic area. Topics will vary each semester based on the interests and expertise of the instructor, and the seminar will be capped at 15 students. Prerequisite: psychology major with 90+ credits. Offered Fall, Spring.
