

Healthcare Management Minor

Students may double count up to six credits with their major.

The **minor in healthcare management (HM)** is designed to prepare students in a wide variety of majors planning careers in any area of the healthcare industry. Students will learn to understand the role and leverage the potential of healthcare analytics. Students taking the minor will acquire skills to identify innovative uses of data to solve healthcare management problems, construct and understand key industry metrics, and guide professional decision-making.

Minor requirements

(All colleges)

18 credits
