The mission of the Philosophy Department of the University of Wisconsin-La Crosse is to nurture excellence in philosophy in thought and practice. This includes offering a broad range of classes, engaging in research that contributes to the body of philosophical knowledge, and providing service for the intellectual, ethical, cultural and professional development of students. The department offers professional expertise in meeting these important educational needs. Thematically and historically philosophy has been and should continue to be the cornerstone of university education. Philosophy addresses questions that are basic to human experience. Hence the Philosophy Department provides a broad base of classes, research and service for the intellectual, ethical, cultural and professional development of students.

The significant features of the Department of Philosophy at UW-La Crosse include its broadly prepared faculty and its diverse course offerings. The philosophy faculty members, all of whom have doctorates in philosophy, represent many different philosophical viewpoints and diverse competencies and interests. The coursework available in the Philosophy Program represents not only all of the important traditional areas of philosophy but also new interests and developments in the field.

Philosophy fosters creative and critical thinking and helps one to understand human thought through the ages as well as developing an insightful perspective on the present scene. Students often major in another discipline at the same time they are studying philosophy. This joint major program is excellent preparation for many programs of study beyond the baccalaureate degree including law, business, and medicine.
